## Parent/ Carer Agreement

### Google for Education

Pupils currently have Google for Education accounts which they use on Chromebook devices for completing classwork in school. The core Google for Education services are approved by the DfE and comply with GDPR. These core services include Google Classroom, Google Drive, Google Docs, Google Sheet and Google Slides. Core services such as Gmail are disabled unless required for internal use by the Computing curriculum. Further information about core Google services can be found at [https://workspace.google.com/intl/en/terms/user\\_features.html](https://workspace.google.com/intl/en/terms/user_features.html).

Some additional services which can be beneficial in an educational context, such as Google Maps, Google Earth and Google Science Journal do not fall under the Google for Education agreement. They require parental consent for any users below the age of 18.

We feel that these additional services can provide an enhanced education experience and would request your permission to enable Google for Education additional services for your child. Further information about Google additional services can be found at <https://support.google.com/a/answer/6356441>. By giving permission you are agreeing to the following:

- I understand this will allow my child access to Google Maps, Google Earth and Google Science Journal and any other additional services which the school feels would be beneficial.
- I understand there is a Remote Learning Policy published on the school website.

**Permission will be assumed, unless you contact us via email or letter to tell us that you do not wish for your child to access the additional services mentioned above.**
